

Matrix SCM provides tailored supply chain management solutions to the public sector. Through a combination of our procurement professionals and end-to-end technology, we streamline the process of recruiting agency staff.

### Software as a Service (SaaS) Model

CR.Net is Matrix SCM's proprietary web-based technology application that automates the end-to-end process of procuring temporary, interim and permanent staff. CR.Net enables our customers to order and review candidates, manage timesheets and supplier payment, receive management information, and effectively manage the supply chain.

Customers who partner with Matrix under a SaaS model, simply pay an annual licence fee for the software and can then decide which if any professional services they wish to purchase from Matrix. Our SaaS customers retain a direct contractual relationship with their suppliers and have the ability to run a Dynamic Purchasing System (DPS).

### The Perfect Service For...

Authorities operating an in-house agency or those with enough internal resource to manage the agency contract on their own, without the professional support of a managed service provider.

### Our Software as a Service (SaaS) Model Customers Include:

### Process Flow
